(+91) 91 67 180463

UI Developer with 7+ Years of Experience

in developing interfaces for Modern Web Apps and Hybrid Mobile Apps

About Me,

Born and brought up in joyful city of Surat, India and currently working as a [Lead UI Developer](#), and a [hobbyist Designer](#), in TATA Consultancy Services, Pune. My work revolves around making [Web Applications](#) and [Hybrid Mobile Apps](#) using HTML Technologies, and creating environment which helps my team efficiently doing the same. As a JavaScript enthusiast, I have also worked with [Node.js](#) for some [experiments](#) and some (in-progress) side projects. Some words I strive for while creating applications are - Delightful, Consistent, Offline-first, Mobile-first, Real-time, Multi-device and Multi-sensory.

Some of My Skills,

And other notable stuff I know,

- + Git as Version Control System
- + LESS CSS Pre-processor
- + JS libraries like Backbone, React, jQuery etc.
- + Frameworks like Bootstrap, jQuery Mobile etc.
- + RESTful APIs using Swagger, Node & Express

My Career and Education so far,

[Assistant Consultant](#) at TATA Consultancy Services

"Growing Inside a Giant"

Again relocating, this time to Pune, to join as a developer who can work well with HTML technologies. I helped them to create a [small, but go-to, team](#) for any UI Development projects. Here, I have got opportunity to jump up the train of trends for taking advantage of [new abilities of HTML/CSS/JavaScript](#) and ecosystem of tools created around the same. With help of my team, we were able to [create a flexible framework & toolset](#) to give us head-start in booting a project quickly and maintaining it well with its growth. Working in this large enterprise also gave me a [good amount of experience](#) in making a project crisis ready, working with multiple vendors and diverse set of stakeholders.

JAN 13 - NOW *

AUG 10 – JAN 13

Senior Software Engineer at Hurix Systems Pvt. Ltd.

"Shifting Along with Time (and Technology)"

After working in Surat for exactly 2 years, I moved to Mumbai, to work with Hurix on their product named [Dictera](#) - a content authoring, management and publishing platform, [powered by Flash Platform](#) at that time. After initially working on its Flex-based Authoring tool, I have played a major role in [transforming the publishing platform to be HTML-based](#) along with addition of support for Mobile devices with their rise in education. By bringing my [perspective from previous experience](#) with large and interactive applications in Flash and ActionScript, we were able quickly convert existing Flash-based activities to HTML.

AUG 08 – AUG 10

Flash Platform Developer at Avinashi Systems Pvt. Ltd.

"Getting Up and Flying!"

With some existing knowledge showcased by my final year [academics project - Mix d'Pix](#) - and my passion for the Flash Platform, I started my career in Avinashi, to sharpen my skills in my [dream technology](#). I was part of their FlashBrain team, who has similar passion for Flash Platform. With their support, I ramped up on how to handle large projects technically and how some known frameworks and patterns can help us along the line. I was lucky enough to be able to work on projects involving [hardware integration, multi-client applications and real-time communication](#) before they were norm.

03 - 08

First Class with Distinction B.E. Computer Science

From Veer Narmad South Gujarat University with 76.83%. Have got the 1st rank in my college in Computer Engineering Department during the final year.
